

## Vasche incasso *Built-in bowls*

Le vasche singole, tonde, ovali o quadrate nella versione da incasso si installano sopra il top della cucina. Il bordo perimetrale degrada dolcemente verso il top della cucina garantendo continuità estetica e maggiore facilità nella pulizia. Spaziano da misure minime a misure professionali, sono molto alte, con pareti verticali e angoli a raggio minimo e quindi più capienti. La varietà di modelli proposti e il sistema di accessori dedicato moltiplicano esponenzialmente le possibilità combinatorie. L'area lavaggio diventa uno spazio flessibile e organizzato che si adatta in modo sartoriale ad esigenze e abitudini diverse.

*Round, oval or square single built-in bowls are installed on the kitchen countertop. The edges curve down gently towards the kitchen countertop and are, therefore, both aesthetically pleasing and easy to clean.*

*They range from minimal to professional sizes, they are very high, with vertical walls and corners with minimal radius which make them more capacious. The variety of models and the range of dedicated accessories increase exponentially the possible solutions. The washing area becomes a flexible and organised working space which can be adapted to meet perfectly all kinds of daily needs.*
